## TCM Formulas

Through careful coordination among our scientists and experts in Traditional Chinese Medicine (TCM), we have created our “TCM Concentrates” product line. Their effectiveness and content keep them loyal to our former line of successful Chinese products and to the Chinese Medicinal Philosophy.

Each product in the TCM Concentrate line has been carefully prepared from the extract of the whole, powdered herb. The herb is filtrated at a temperature low enough to minimize evaporation and the loss of the active constituents of the herb, yet high enough to allow a synergistic interaction. This is different from the Occidental philosophy, which concentrates the herbs individually and then combines them. In TCM, the entire formula is extracted as a whole, resulting in a powerful, extremely potent product.
